Run Instructions

1. Place PDFs in the working directory

Example test files:

- `electronics-brochure.pdf`

- `1706.03762v7.pdf`

- `Company profile.pdf`

2. Build Docker image

docker build -t persona-doc-intel .

3. Run the API server

docker run -p 8000:8000 persona-doc-intel

Test Input (Swagger UI or cURL)

Swagger UI: Open http://localhost:8000/docs

Upload the 3 PDFs and provide:

- **Persona:** `Product Manager in semiconductor solutions`

- **Job:** `Extract key value propositions and product categories to present to clients`
